# Étapes

## Steps

①

Visser les deux vis M5x16 au travers du support de fixation haut et des trous taraudés dans le cadre.

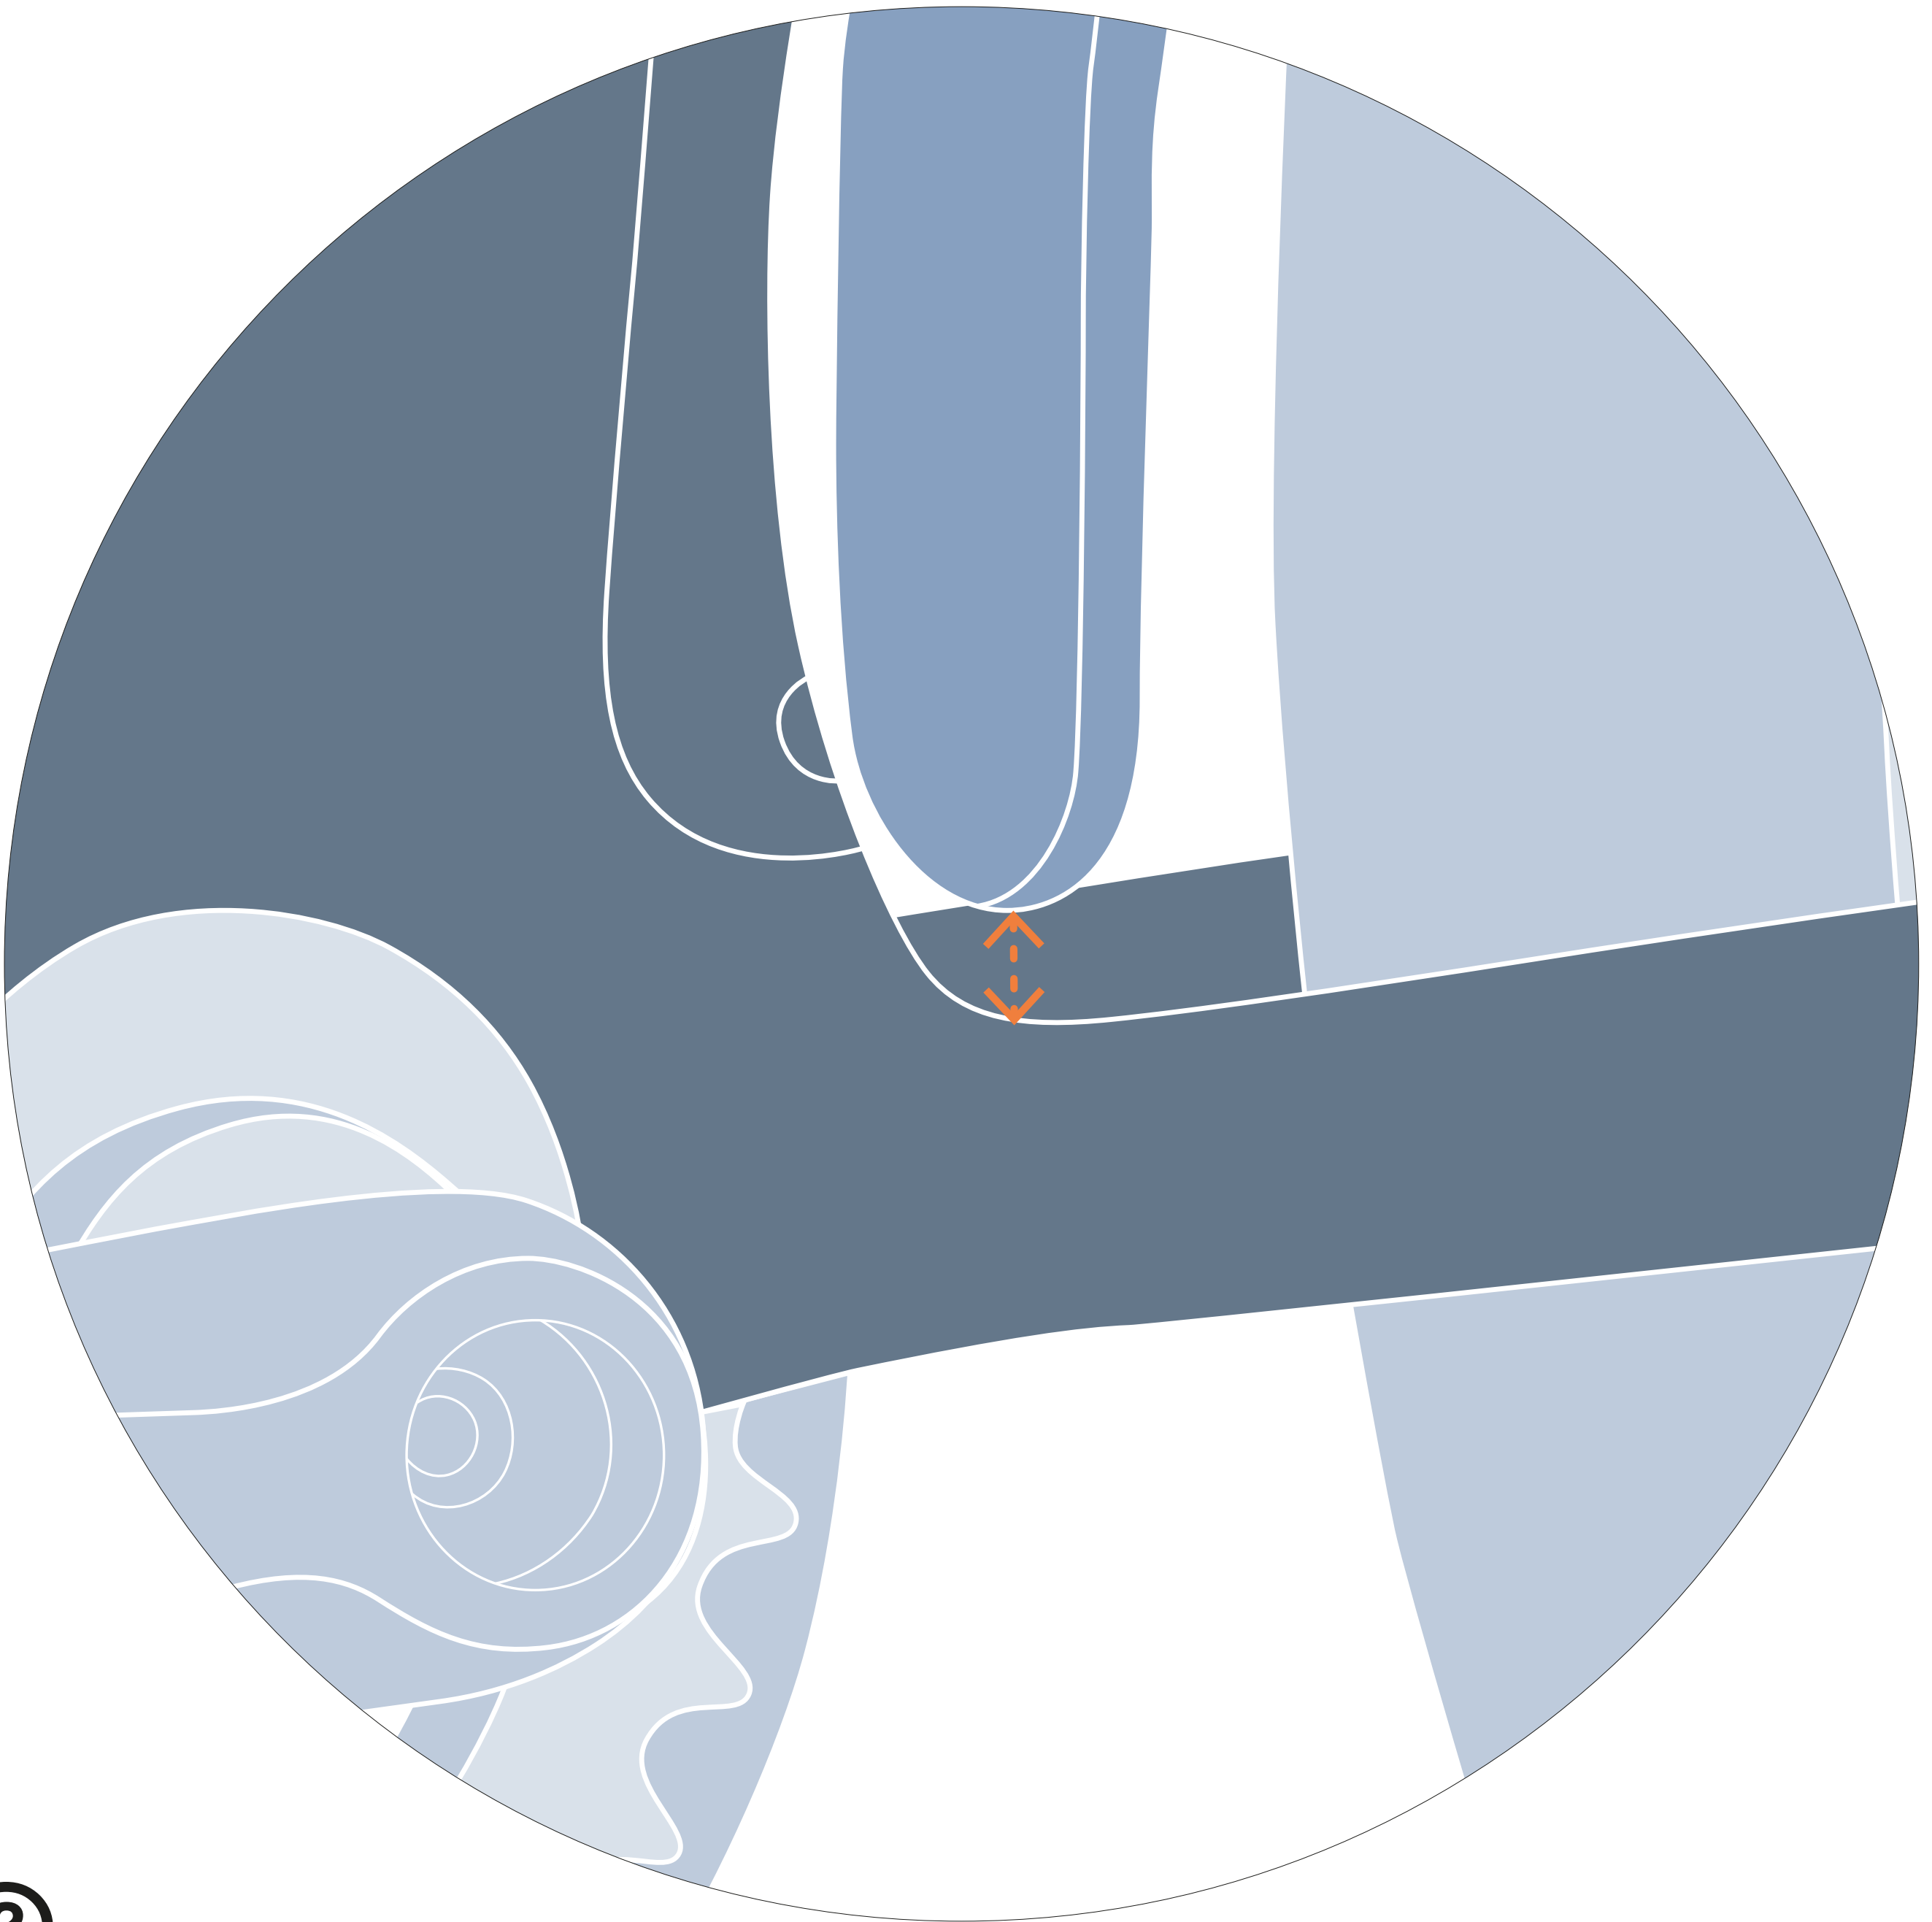

*Couple de serrage 2.2N.m ± 0.2*

Screw the two M5x16 screws through the top mounting bracket and the threaded holes in the frame.

*2.2N.m ± 0.2 tightening torque*

# Étapes

## Steps

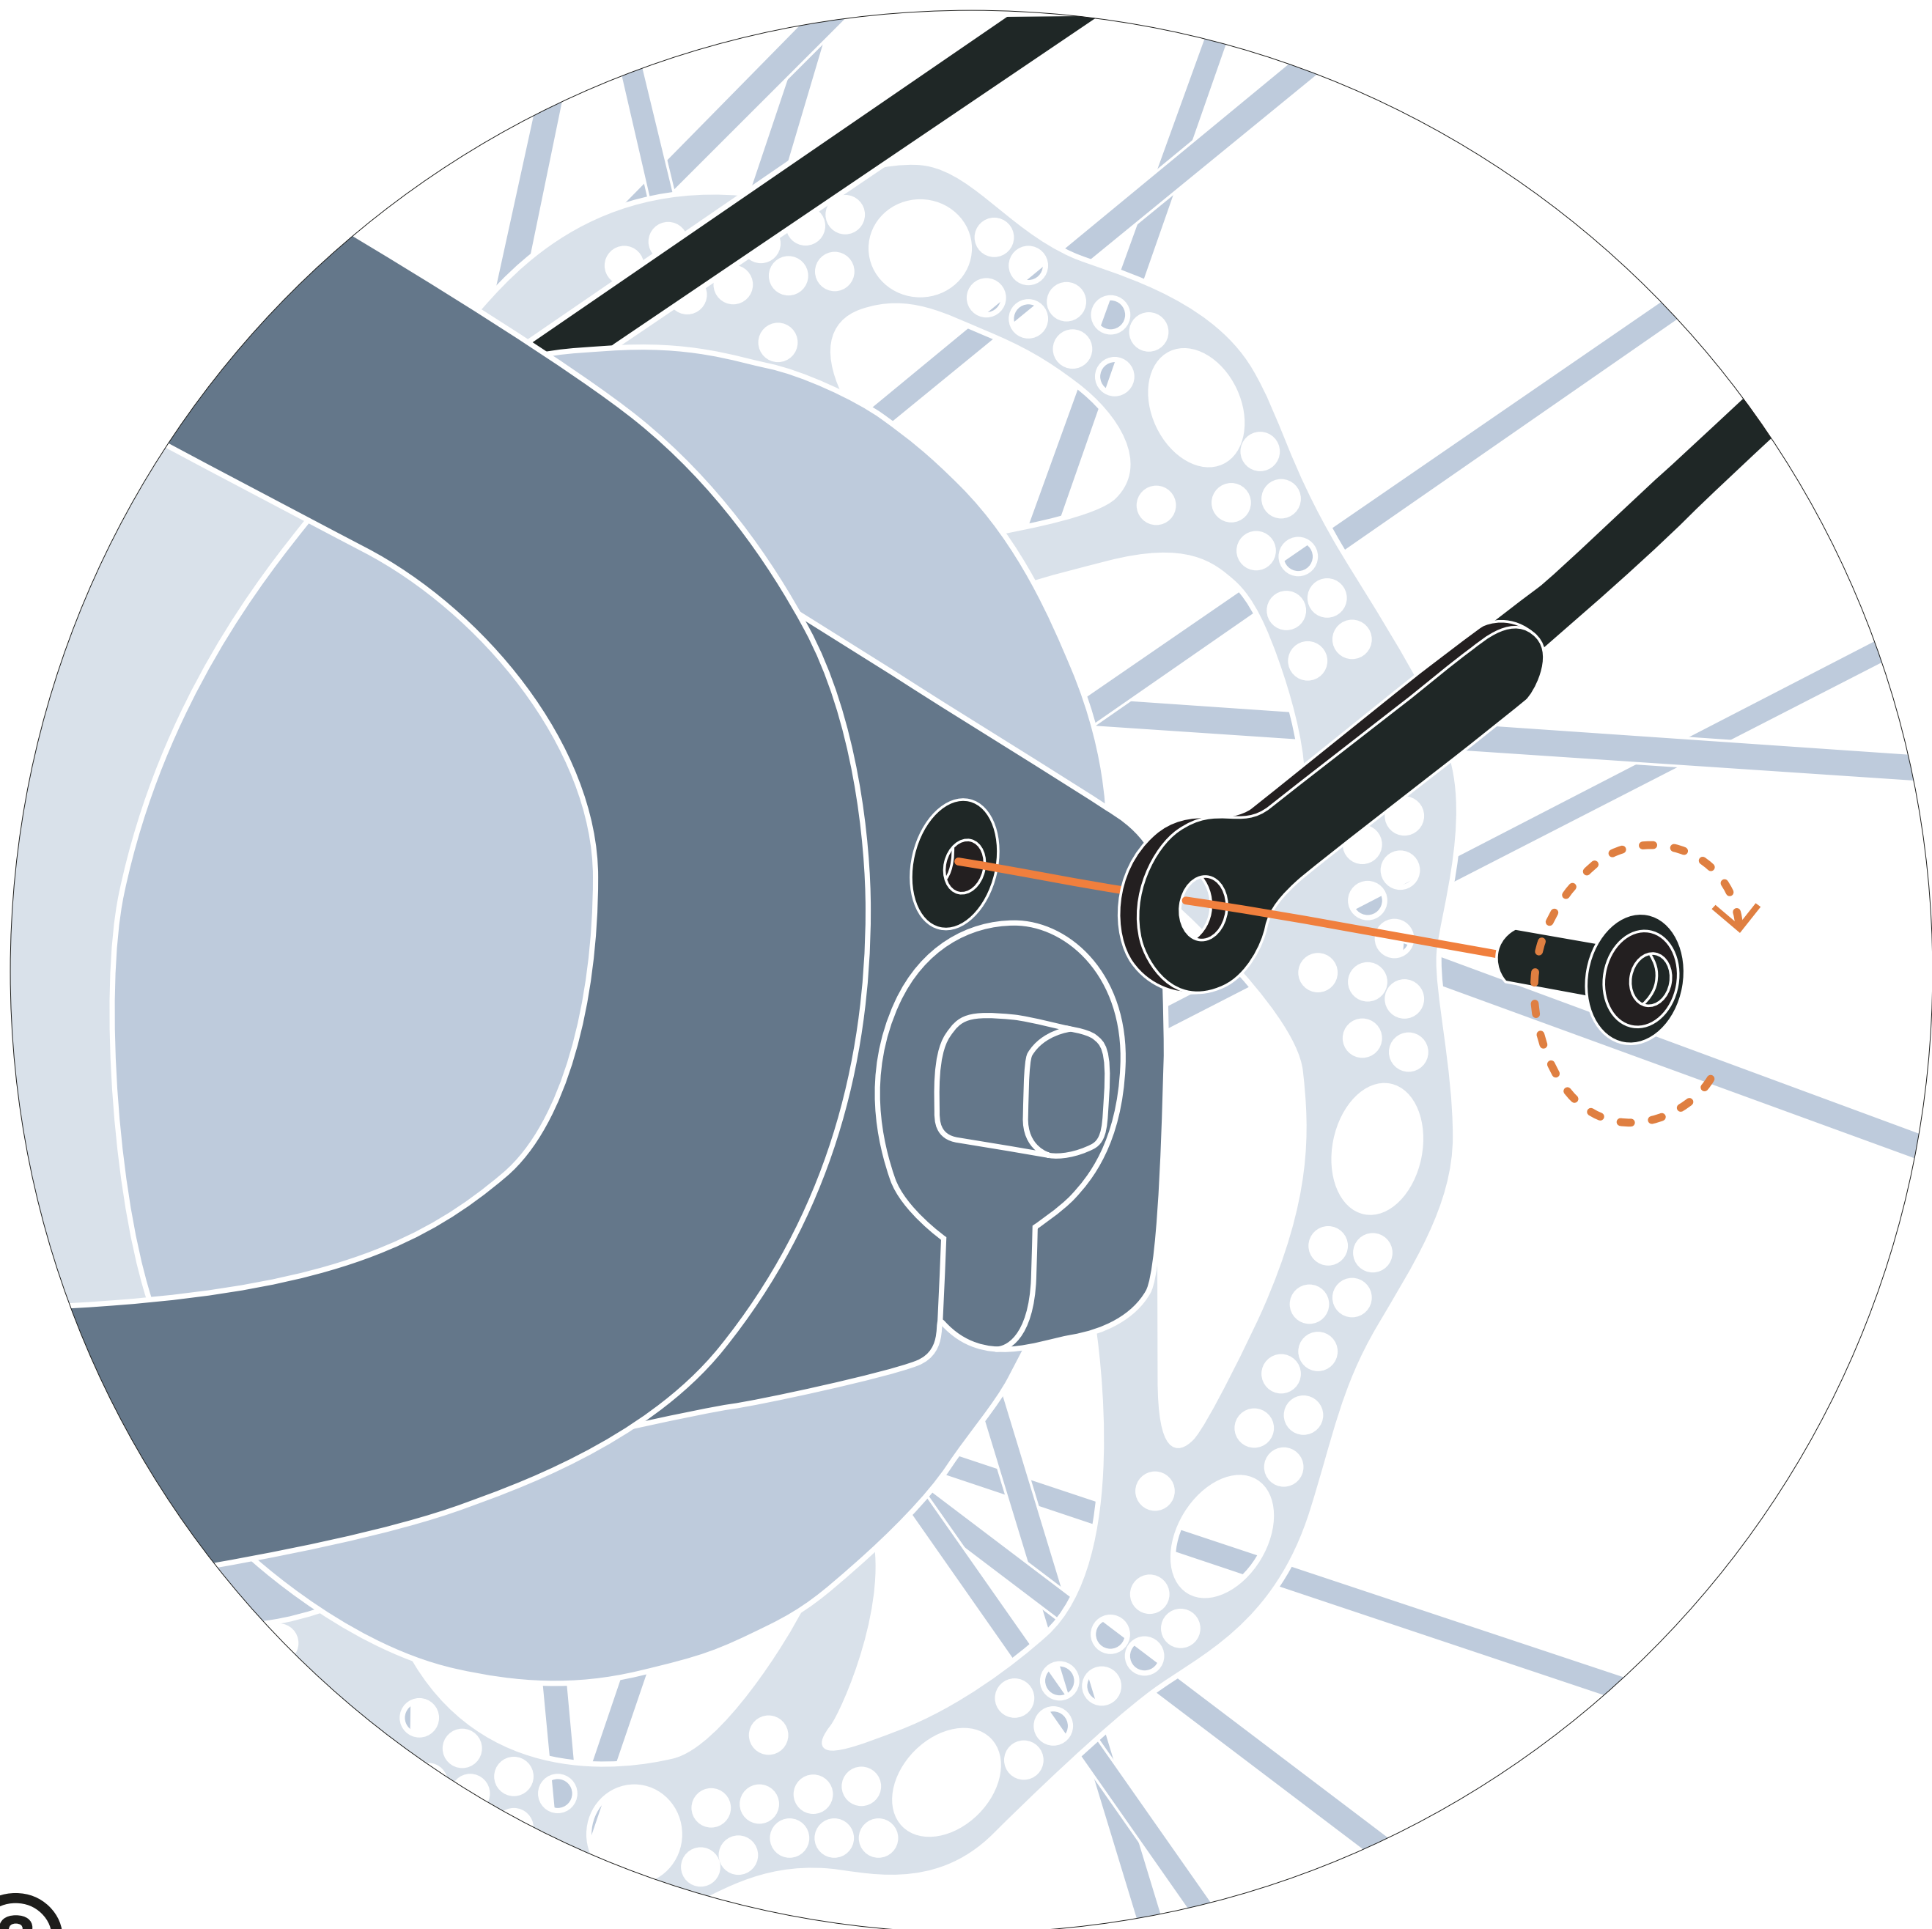

②

Assurez-vous que la partie bois inférieure ne soit pas en contact avec le cadre.

Check that the wooden part is not in contact with the bike frame.

# Étapes

## Steps

③

Visser les deux vis M5x16 au travers des platines de fixation des tringles et des trous taraudés dans le cadre.

*Couple de serrage 2.2N.m ± 0.2*

Bolt the two M5x16 screws through the rods mounting plates and the threaded holes in the bike frame.

*2.2N.m ± 0.2 tightening torque*
